

# COMPETITIVE & TRANSPARENT SERVICING & MAINTENANCE PACKAGES

Working in partnership with

From materials handling equipment, to plant equipment, agricultural and a wide range of specialist vehicles; Briggs has the expertise and experience to provide a complete engineering solution.

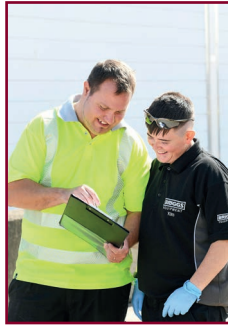

- 600+ field based engineers throughout the UK & Ireland
- Quick response times nationwide\*
- 98% fleet uptime for our customers
- 24/7 emergency call out service
- 96% first time fix on breakdowns (VOR)
- 120 service centre staff nationwide

## Keeping business moving

\* Target average response time to a VOR (Vehicle Off Road) breakdown is same day attendance if reported before 10am.

With over 600 field based engineers throughout the UK & Ireland, we have an engineer just around the corner from you. Covering all brands and applications, our guaranteed quick response times ensure a fast, efficient and professional service from a fully trained team of expert engineers.

### Thorough examinations

Briggs Equipment can provide a statutory check of all your equipment to ensure that all mechanical parts are compliant and in safe working order.

### Training services

We provide courses for all types of materials handling equipment, as well as courses for operating access and mobile plant equipment, overhead cranes and other machine types.

### Parts and tyres

Briggs Equipment supplies competitively priced parts and tyres for all major brands of lift truck and other types of equipment.

### Managing your fleet

We provide a single point of contact and regular planned review meetings, to ensure we effectively manage your fleet. When a telephone call or face-to-face meeting is not appropriate, the BE Portal – an interactive web based KPI report tool – will enable you to monitor response times, fleet utilisation, first time fix and much more.
